**Description**

Cladding panels / roofing

**Material properties**

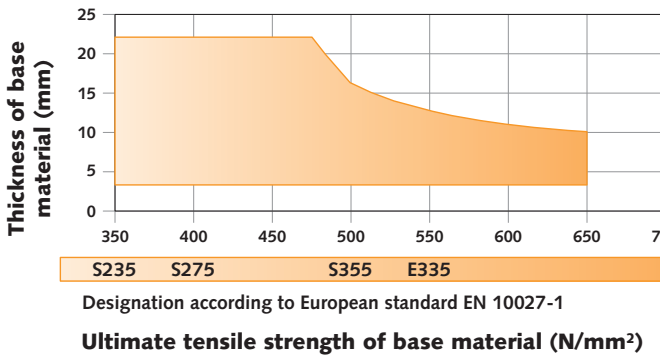

The SBR 14 nails are composed of :

- **Carbon steel shank**
  - Ultimate tensile strength : 2300 N/mm<sup>2</sup>
  - Yield strength : 1600 N/mm<sup>2</sup>
  - Electrogalvanised, min zinc coating 7 µm
- **Steel washer**
  - Min zinc coating 8 µm
  - Electrogalvanised
  - The washer is designed to give effective clamping force
- **Kesternitch test, 2 cycles exposure**

$V_{Rd} = V_{Rk} / \gamma_M$  : the design load is calculated from the characteristic load and a partial safety factor  $\gamma_M = 1.33$ .

$N_{Rd} = \alpha_{cycl} \times N_{Rk} / \gamma_M$  : the design load is calculated from the characteristic load and a partial safety factor  $\gamma_M = 1.33$  and  $\alpha_{cycl} = 1$ .

For the calculation of the recommended load, we applied the partial safety factor  $\gamma_F = 1.5$ .
