

Spit Buildex Teks Self Drilling Steel Screws

The original self-drilling, self-tapping screw for fastening various materials to steel. Teks Screws drill, tap and fasten in-one operation.

Teks Screw Installed

Substrate

- Steel

Applications

- Steel framing systems
- Brick ties
- Bracketry to steel
- Flashing
- Composite panels
- Wind posts

Features and Advantages

- No hole alignment issues
- High clamping action
- Eliminates the need for costly drill bits
- The integral washer on Maxiseal prevents water ingress and reduces bimetallic corrosion
- High thread on Maxiseal MXHT supports the outer sheet of composite panels
- Maximum pullover performance
- Excellent driving stability
- Point to thread design maximises pullout performance
- Non walking point provides fast material engagement
- Seals when driven at an angle - Maxiseal 1 - 2°
- Sharp convex drill point has precise cutting edges to improve drill performance with less effort
- Climaseal finish provides excellent corrosion resistance and lower tapping torque
